

**AMENDMENTS TO THE SPECIFICATION**

Please amend the second paragraph of the section titled “Brief Description of the Drawings” which begins at page 8, line 9, as follows:

-- Figures 2A-2B show design of the targeting construct used to disrupt adrenomedullin receptor genes. Figure 2A shows the location and extent of the disruption of the target gene, an adrenomedullin receptor (SEQ ID NO:1), as well as the sequences flanking the disrupted portion of the gene. Figure 2B shows the sequences identified as SEQ ID NO:2 and SEQ ID NO:3, which were used as the targeting arms (homologous sequences) in the adrenomedullin receptor targeting construct.--

**AMENDMENTS TO THE DRAWINGS**

Please replace the most current version of Figure 2A with the new version of Figure 2A. A substitute drawing sheet is attached herewith containing Figure 1 as previously filed, and Figure 2A as amended.
